

### HAP33: Weakness not due to stroke

Which form of Guillain-Barré syndrome is most commonly seen in the UK?

What are the usual presenting symptoms of Guillain-Barré syndrome?

What treatments are known to be effective in treating Guillain-Barré syndrome?

What paraneoplastic syndrome mimics Myasthenia Gravis?

Give three drug classes contraindicated in Myasthenia Gravis?

How would you modify your dose of Rocuronium to perform RSI in a patient with known Myasthenia Gravis?

Define Multiple Sclerosis?

What are the three patterns of MS seen?

What is the main treatment for an episode of MS?

What are the main causes of death in patients with MS?

How many cases of Tetanus occur in the UK each year?

What type of bacterium causes tetanus? How is this relevant to the likelihood of contracting tetanus?

Complete the table:

Immunisation status	Clean wound	Tetanus-prone wound	
	Immunisation	Immunisation	HTIG
Full primary course + two boosters			
Full primary course, last booster <10 years			
Incomplete primary or complete primary but <2 boosters, last >10 years			
Not immunised/not known-			

What are the usual initial signs of tetanus infection?

What is the most common route of contracting botulism? Which group is at most risk?
